

Advance with a Master of Science in Athletic Training

You're a certified athletic trainer, but now you're ready to advance your knowledge, expand your career options, or gain higher pay. If this describes you, the post-professional **Master of Science in Athletic Training (MSAT)** program at A.T. Still University (ATSU) was designed by ATs with you in mind!

Join ATSU's legacy of preeminent osteopathic healthcare and demonstrate to the world your readiness to take on challenges in the AT field when you complete your master's. ATSU will provide you the knowledge and practical application opportunities necessary to enhance patient care, contribute to the field of athletic training, and develop professionally.

WHY CHOOSE ATSU FOR YOUR MASTER'S DEGREE?

When you choose ATSU for your post-professional master's degree, you're choosing a program that...

- Is taught by industry-renowned faculty who are experts in the AT field
- Can be completed entirely online and asynchronously
- Offers advanced standing for later completion of your doctorate in athletic training
- Has four start dates per year, and can be completed in as little as one or two years
- Offers three elective track options: Rehabilitation, Orthopaedics, or Sport Neurology and Concussion

"I loved my time at ATSU, the professors I had, and the people I met. While earning your entry-level degree, you learn to be an athletic trainer, but in a post-professional program, you learn how to take care of people. I've always considered myself a leader in the profession and education is so important to me, so I decided to continue my education with the DAT."

– Casey M., MSAT & DAT alumna

IMAGINE YOUR CURRICULUM

The curriculum consists of 30 credit hours designed around the foundations of patient-oriented outcomes, quality improvement, evidence-based practice, and research.

From **Assessment of Movement Dysfunction to Orthopaedic Surgical Considerations to Corrective Techniques for Movement Dysfunction**, the MSAT curriculum is a rare combination of expansive and deep. What's more, when you complete your master's with ATSU, you are already 24% of the way to obtaining your Doctor of Athletic Training (DAT).
